INSTALLATION INSTRUCTIONS

IMPORTANT

PLEASE DON'T HURT YOURSELF, THE KIT, OR YOUR VEHICLE. TAKE A MINUTE TO READ THIS IMPORTANT INFORMATION.

SAFE INSTALLATION

Please take all safety precautions during installation. A hydraulic jack can fail, and if that happens, you can be seriously hurt, or worse, if you are relying on it to hold up the vehicle. If you use a hydraulic jack, secure jack stands in the appropriate locations and chock any tires still touching the ground.

Wear safety glasses or goggles. Your eyes may be lower than some parts and pieces, and you don't want to lose an eye.

Remove the possibility of any electrical issues by disconnecting the negative battery cable.

VEHICLE GVWR

NEVER exceed the maximum load recommended by the vehicle manufacturer (GVWR). The GVWR can be found in your vehicle's owner's manual or on the data plate on the driver's side door. Consult your local dealership for additional GVWR specifications.

PRESSURE TO LOAD

Be sure to review the load limits noted in the Air Spring Kit Installation Instructions (sold separately).

APPROPRIATE AIR PRESSURE

For best ride, use only enough air pressure in the Air Springs to level the vehicle when viewed from the side (front to rear). This will vary, depending on the load, location of the load, condition of the existing suspension, and personal preference.

**ONCE INSTALLED SUCCESSFULLY, FOLLOW THE PRESSURE REQUIREMENTS FOR THE AIR SPRINGS.
FOR FIRESTONE, GENERALLY:**

PLANNING THE INSTALL

THESE PLANNING STEPS WILL HELP YOU SAVE TIME AND WILL MAKE THE INSTALLATION EASIER.

DETERMINE THE MOUNTING LOCATION FOR THE AIR COMMAND KIT

- This Kit comes with a Mounting designed specifically for the provided Air Compressor and ECU.
- Refer to the Mounting Kit Manual attached at the end of this Kit's Manual for additional instructions.
- Consult the **OPTIONAL** instructions below and in Section 2 only if the Mounting Kit does **NOT** fit your vehicle.

PLAN INSTALLATION ROUTES FOR WIRING AND AIR LINES

- Make sure the Wire Harness and Air Tubing are not exposed to sharp metal edges that can damage them.
- Use supplied Thermal Sleeves on Air Tubing when routing near heat sources.
- Use supplied Nylon Ties to secure Air Tubing and Wire Harness to the vehicle.
- Make a loop in the Air Tubing where shown. This creates a water/debris trap that protects the Air Compressor.
- Measure twice, cut once!

TAPE ALL ELECTRICAL CONNECTIONS

- Use electrical tape to appropriately secure and protect all electrical connections.

USING PUSH-TO-CONNECT FITTINGS FOR AIR LINES

Your kit includes Push-to-Connect fittings to connect the Air Tubing to hardware. Use the instructions below when using the Air Tubing.

- 1** Insert end of Air Tubing into Air Fitting.

- 2** Push Air Tubing into Air Fitting as far as possible.

- 3** Gently pull on the Air Tubing to check for a secure fit.

- 4** To remove, push down collar and gently pull Air Tubing away.

Removal Tip: Use a 1/4", 5/16", or 6mm open-ended wrench to push the collar down.

OPTIONAL

DETERMINE THE MOUNTING LOCATION FOR THE AIR COMPRESSOR AND ECU

- Mount in a location protected from airborne debris and moisture.
- Allow room for the Air Tubing to run without sharp curves or bends.
- Allow room for the Tubing to connect to the Air Fitting on the ECU.
- Allow room for the 4-pin ECU connector to connect to the ECU.
- Mount close enough together to allow Wire Harness connections to reach the Air Compressor and ECU.
- Using supplied fasteners shown in Step 3 is recommended. If no other mounting option is available, see the sidebar on Step 2 for using the Large Nylon Ties.
- Select a location that is solid and secure on the body or frame of the vehicle, away from any moving parts, electrical or any other lines.

1

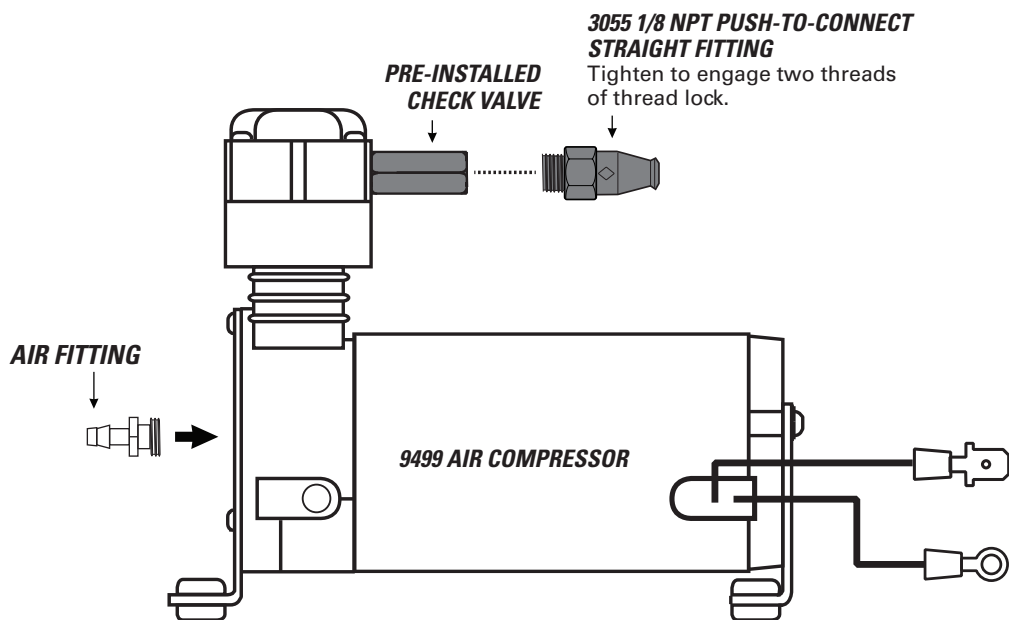

PREPARE THE AIR COMPRESSOR

NOTE: Air Compressor can be mounted facing any direction.

1 Install 1/8 NPT Push-to-Connect Straight Fitting on the Check Valve.

2 Install Barbed Air Fitting in Inlet Port of the Compressor from Air Compressor Kit.

OPTIONAL - DRILL HOLES FOR AIR COMPRESSOR AND ECU

2

IF YOU ARE USING THE SUPPLIED FIRESTONE AIR ACCESSORY MOUNTING KIT, SKIP THIS STEP AND REFER TO THE MOUNTING KIT'S INSTRUCTIONS AT THE END OF THIS MANUAL.

STOP HERE AND SKIP THIS STEP IF USING THE PROVIDED MOUNTING KIT

CHECK SURROUNDING AREA AND BACK SIDE OF MOUNTING LOCATION TO AVOID DRILLING INTO EXISTING LINES OR WIRING.

Drill within reach of the ground wire ring terminal on body or frame of vehicle or create a wire to link to the negative battery terminal. Minimum gauge of wire should be 12.

AIR ACCESSORY MOUNTING KIT CANNOT BE USED AS A GROUNDING LOCATION FOR THE AIR COMPRESSOR.

1 Using the Air Compressor and ECU as templates, mark drill locations as shown with a punch or marking tool.

2 Mark Air Compressor ground wire fastening location within reach of the ground wire ring terminal.

3 Drill 7/32" diameter holes. Remove any burrs and debris from drill holes.

ASSURE THAT YOU INSTALL THE AIR COMPRESSOR AND ECU CLOSE ENOUGH SO THE CONNECTORS ON THE WIRE HARNESS WILL REACH THEM BOTH.

OPTIONAL ECU MOUNTING

If there is no other mounting option, use two Large Nylon Ties to secure ECU to the location determined in planning the install section. Route the Nylon Ties under the ECU and around the mounting location.

3

INSTALL THE AIR COMPRESSOR AND ECU

DO NOT OVER TIGHTEN MOUNTING BOLTS AND NUTS ON THE AIR COMPRESSOR. TOO MUCH TORQUE CAN CRUSH THE BRASS INSERTS AND RUBBER ISOLATORS.

1 Mount the Air Compressor to the hole locations on the provided Mounting Kit using the supplied fasteners. DO NOT OVERTIGHTEN.

2 Mount the ECU to the hole locations on the provided Mounting Kit using the supplied fasteners.

3 Mount the black ground wire ring terminal using the supplied fasteners. Assure that the ring terminal makes a solid contact with bare metal for a proper ground.

OPTIONAL

Mount to the drill holes made in the frame. Do this only if the mounting kit will not mount to the frame of the vehicle.

1 Route the Wire Harness in the most protected manner possible, and securely make all connections as shown.

2 The yellow wire is not used. Wrap or wire nut it to protect it from the environment.

5

INSTALL AIR LINE TUBES

EXHAUST ALL AIR FROM THE SYSTEM PRIOR TO RELEASING AIR TUBES FROM AIR FITTINGS.

1 Route the Air Tubing from 1/8 NPT Push-to-Connect Straight Fitting on the top of the Air Compressor to the first 1/4" Push-to-Connect Tee.

2 From the 1/4" Push-to-Connect Tee, route Air Tubing to the ECU, as shown.

3 Route Air Tubing from each Air Spring and connect to a 1/4" Push-to-Connect Tee, as shown.

4 Route Air Tubing to connect the two 1/4" Push-to-Connect Tees, as shown.

DO

Make sure the cut is as square as possible. Use a tube cutter or very sharp utility knife.

DON'T

Fold or kink the Air Tubing. Cut the Air Tubing at an angle. Use pliers, scissors, snips, saws, or side cutters.

PROPER AND IMPROPER CUTS IN THE AIR TUBING

IF USING THE OPTIONAL NO-DRILL INFLATION VALVE BRACKET, CHOOSE OPTION 1. IF DRILLING, CHOOSE OPTION 2. **INFLATION VALVE MUST BE ACCESSIBLE BY AN AIR CHUCK.**

1 Secure the Air Inflation Valve Bracket to a protected, secure location. **PROCEED TO STEP 3.**

2 Select a protected location to install the Inflation Valve, such as the bumper or the body of the vehicle.

Drill a 5/16" hole for Inflation Valve install location.

3 Install Inflation Valve Assembly as shown.

1 Run Air Tubing from the location of the installed Inflation Valve in Step 6 to the Air Tubing that connects the two installed 1/4" Push-to-Connect Tees.

2 Cut the piece of Air Tubing that connects the two installed 1/4" Push-to-Connect Tees.

3 Install the Air Tubing into the 1/4" Push-to-Connect Tee, as shown.

4 Install the Air Tubing into the Inflation Valve, as shown.

1 Download and install the Firestone Air Command app on a compatible iPhone or Android device.

2 Open the app. Once the app has established a Bluetooth connection on startup, it will automatically link to the ECU.

1 FUNCTIONS OF REMOTE BUTTONS

2 HOME SCREEN LAYOUT

CONNECTION TO AIR COMMAND CONTROLLER:

- The Air Command App by default requires users to input the controllers passcode before Bluetooth allows connection.
- The Air Command Remote will connect automatically as long as the passcode on the remote matches the controllers.
- The default passcode is 1234.
- Double check the passcode from the app if using both to connect to the controller.
- The next page shows how to access the passcode menu and change it on the remote.

3 ACCESSIBILITY

When the remote is off, press any button to turn on the remote.

Hold the up and down arrows at the same time to access the remote settings screen.

Hold down M1 and M2 to access the passcode entry screen.

Not Connected! - If this warning remains more than 30 seconds after waking up the remote does not detect an active ECU. It could be caused by a wiring issue, the ECU not getting power, or an incorrect passcode.

Brightness - Adjust the intensity of the backlit screen.

Timeout - Adjust how long the remote will stay idle before turning off.

PSI/BAR - Select pressure unit of measure.

PSI - Imperial BAR - Metric

Passcode - Use all 4 buttons to navigate and adjust the passcode selection.

*If also using the app the passcodes entered must both be the same. Default passcode is 1234.

12

TEST THE SYSTEM

With the Air Command™ App and your air springs installed, you are ready to test the system.

- 1 Reattach the negative battery cable.

- 2 Turn on your vehicle's ignition.

- 3 Use the Air Command™ App or Single Remote to inflate the Air Springs to 70 PSI. See Step 10 or 11 for details.

- 4 Spray fittings with soap and water mixture or glass cleaner.

- 5 Observe bubbles.

SMALL SOAP BUBBLES THAT DO NOT EXPAND

SOAP BUBBLES THAT EXPAND

NO LEAKS?

Congratulations! You're riding right with the push of a button! Remember to review the Operating Instructions.

LEAK?

Bummer. Continue to step 13 to fix the leak.

EXHAUST ALL AIR FROM THE SYSTEM PRIOR TO RELEASING AIR TUBES FROM AIR FITTINGS.

- 1 Use the Air Command™ App or Single Remote to deflate the Air Springs to 5 PSI. See Step 10 or 11 for details.

LEAK AT AIR TUBING AND AIR FITTING

Release Air Tubing (see page 4). Review proper cuts and procedures in step 5. Repeat step 5.

LEAK AT BASE OF AIR FITTING

Tighten Air Fitting one turn or until leak stops.

STILL HAVE A LEAK?

Refer to the Troubleshooting section of the Instruction Manual. If the leak persists, or if there is an issue with a leaking part, email us at rrtech@fsip.com. If emailing, please include photos to help us better diagnose and understand any problems you may be experiencing.

AIRIDE

firestoneairide.com

BEFORE YOU DRIVE, CONFIRM THE FOLLOWING:

- Secure all AirTubing and wiring.
- The system passes the leak test and holds air.
- The Air Compressor ground ring terminal is contacting bare metal, and coated with silicone if possible.
- The Wire Harness is grounded to the negative (-) battery terminal. The ECU needs a good, clean, interference-free ground.
- There is a loop in the AirTubing as shown to prevent water or debris from getting into the Air Compressor head and damaging it.

Or, email us at rrtech@fsip.com. If emailing, please include photos to help us better diagnose and understand any problems you may be experiencing.

INSTALLATION INSTRUCTIONS

! IMPORTANT

PLEASE DON'T HURT YOURSELF, YOUR KIT OR YOUR VEHICLE. TAKE A MINUTE TO READ THIS IMPORTANT INFORMATION.

DO NOT INSTALL IF THE TRUCK HAS BEEN LIFTED AND THE STOCK JOUNCE BUMPER SPACERS ARE NOT ON THE VEHICLE. *This kit is to be used on a pickup truck only, and DOES NOT INCREASE YOUR VEHICLE'S MAXIMUM LOAD.*

SAFE INSTALLATION

Please take all safety precautions during installation. A hydraulic jack can fail, and if that happens, you can be seriously hurt, or worse, if you are relying on it to hold up the vehicle. If you use a hydraulic jack, secure jack stands in the appropriate locations and chock any tires still touching the ground.

Wear safety glasses or goggles. Your eyes may be lower than some parts and pieces, and you don't want to lose an eye.

Remove the possibility of any electrical issues by disconnecting the negative battery cable.

KIT USES

This kit works with Air Command Kits 2920, 2921, 2922, and 2923. Refer to the following pages for kit-specific layouts to ensure all of the components fit onto the Compressor Mount Plate.

VEHICLE GVWR

NEVER exceed the maximum load recommended by the vehicle manufacturer (GVWR). The GVWR can be found in your vehicle's owner's manual or on the data plate on the driver's side door.

INFLATING THE AIR SPRINGS

When inflating air springs, add air pressure in small quantities, checking air pressure frequently. The air springs have much less air volume than a tire, so they inflate much more quickly.

APPROPRIATE AIR PRESSURE

For best ride, use only enough air pressure in the air springs to level the vehicle when viewed from the side (front to rear). This will vary, depending on the load, location of the load, condition of the existing suspension, and personal preference.

PARTS

Compare the parts below to your kit. Ensure you have all pieces, and organize them for an easier installation.

MAIN KIT CONTENTS

PT # 5694	 x 1 NO DRILL COMPRESSOR PLATE	PT # 5965	 x 2 PLATE CHANNEL MOUNT	PT # 5966	 x 2 BACKING PLATE
-----------	--	-----------	---	-----------	--

A21-760-2642 HARDWARE PACK

PT # 3067	 x 8 3/8"-16 HEX HEAD FLANGE NYLOCK NUT	PT # 3072	 x 4 3/8"-16 X 1" CARRIAGE BOLT	PT # 3502	 x 8 3/8"-16 X 6" CARRIAGE BOLT
-----------	---	-----------	---	-----------	---

- 1 Mount the No-Drill Compressor Plate to the Plate Channel Mounts shown below.
- 2 Align the Compressor Plate to the bottom of the slots in the Plate Channel Mount.
- 3 Select a suitable location for installation on the vehicle frame rail. Take a tape measure to get a rough height of the frame rail. Use that measurement to determine which holes to use in the mounting plates (distances between holes shown below). It is recommended to mount to the passenger side frame rail as the vehicle's battery is normally located in the engine compartment on the passenger side. Double check before final installation.

2

INSTALL THE ECU

Fasteners included in Air Command Kit

x 2

x 2

x 2

DO NOT OVERTIGHTEN MOUNTING BOLTS AND NUTS ON THE ECU. TOO MUCH TORQUE CAN CRACK THE PLASTIC FEET ON THE ECU.

1 Mount the ECU to the hole locations in the Compressor Plate using the supplied fasteners. DO NOT OVERTIGHTEN.

Fasteners included in Air Command Kit

DO NOT OVER TIGHTEN MOUNTING BOLTS AND NUTS ON THE AIR COMPRESSOR. TOO MUCH TORQUE CAN CRUSH THE BRASS INSERTS AND RUBBER ISOLATORS.

1 Mount the Air Compressor to the hole locations in the Compressor Plate using the supplied fasteners. DO NOT OVERTIGHTEN.

2 It is recommended to face the outlet of the compressor towards the air springs on the rear axle of vehicle.

6

MOUNTING TO THE VEHICLE - USE FOR HEAVY DUTY AIR COMMAND KITS 2921 & 2923

AIR ACCESSORY MOUNTING KIT CANNOT BE USED AS A GROUNDING LOCATION FOR THE AIR COMPRESSOR

1 Install the compressor bracket assembly to the vehicles frame rail, using whichever carriage bolt holes are closest to the top and bottom of the vehicle frame as was determined in Step 1.

RECOMMENDED

2 Follow Air Command Kit instructions to run air line from the Air Compressor to the ECU.

3 Continue following the Air Command Kit instructions to connect all air tubing and electrical wiring.

AIRIDE

firestoneairide.com

BEFORE YOU DRIVE, CONFIRM THE FOLLOWING:

- Make sure all fasteners are tight and secure.
- Make sure the installation does not interfere with any other components on the vehicle.
- Reattach negative battery cable.

NEED INSTALLATION HELP?
